

## **ACDi Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) for Substances of Very High Concern (SVHC) Declaration**

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Regulation requires the identification of Substances of Very High Concern (SVHC) contained in articles above the threshold 0.1% w/w manufactured and marketed in the EU (Legal Reference EC 1907/2006). ACDi declares that its internal manufacturing processes are REACH compliant for the list of SVHC materials.

ACDi has surveyed its printed circuit board vendors and they declare that they are also REACH compliant, as long as the material specified by the customer's documentation is REACH compliant.

ACDi purchases other material to the customer's Approved Vendor List (AVL). As this AVL is control by our customer, we cannot declare that the material purchased from this AVL is REACH compliant. However, ACDi can aid our customers to determine whether their AVL is REACH compliant and help identify potential substitute material.
